Customer service excellence has always been our constant drive. At Shakti, we push the boundaries by improving our knowledge about the field.

With this knowledge, we constantly improve our manufacturing process for positive results in production.

Shakti International, an Innovative Engineering Solutions Company, has had over a decade and a half of experience working on industrial solutions for many major multinational companies.

Being an ISO 9001:2015 certified company from TUV SUD, **we manufacture high quality 'Precision Mechanical Parts' in all sorts of special metal and plastic types, exporting it to our European customers in the sensor control and measuring instrument industry.**

We also specialize in manufacturing sensor housing for various type of transducers, flow indicators, level gauges, and pressure transmitters to name a few. These are subsequently used in various fields like Medical, Aerospace and Industrial. We can cater product manufacturing according to the customer's drawings, specifications and needs.

At Shakti we have a team of well-qualified and experienced engineers, supervisors, foremen and workers who are regularly trained in accordance with the latest techniques of production and quality control. We strive to move forward with the evolvement and improvement of technology as a team. The quality of our product and customer satisfaction is our main priority as reflected through our motto:

"Provide the right parts at the right price and at the right time."

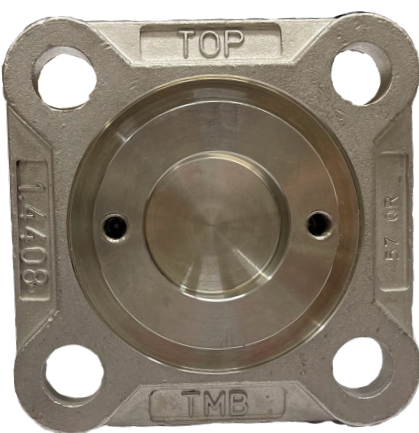

More About Us

One of our Strengths at SHAKTI is machining of difficult parts and critical parts which have lot of secondary operations and different types of machining to be done on different angles.

We also specialize in threading, deep "O" ring grooving and other precision machining which Guarantees the quality requirements of our customers.

We also have elite experience with manufacturing critical components such as machining of fixflanges, Counterflanges and wet parts.

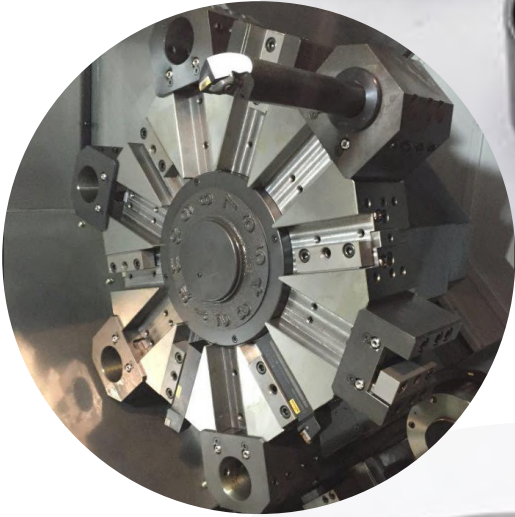

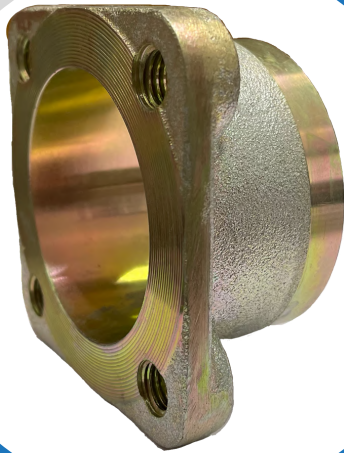

We manufacture these parts on CNC Turning Machines from "DOOSAN". As required secondary operations are carried out on conventional turning machines, milling machines, drilling and tapping machines

VISION & GOAL

We aim to be an important and reliable partner within the supply chain of our Customers. This will be achieved through Innovation, Technical Leadership and the low-cost supplying of Quality Components. It is our endeavor to go out of our way to be receptive and responsive to all customer demands.

QUALITY SYSTEM

All of our production is inspected online as well as offline with a thorough final inspection before dispatch. We also maintain precise inspection reports & samples for future references for all the materials dispatched in our directory.

With the help of regularly calibrated gauges and tooling required for inspection we guarantee our customers a qualitative, long-lasting product.

MANUFACTURING PROCEDURE

Every new order is minutely studied and measured for a pre-approval with samples sent to the client. Each dimension & diameter in the drawing is looked after with utmost vigilance. Regular and indiscriminate checkings with state of the art measuring instruments are been done on the daily baize.

QUALITY POLICY

We commit to satisfy our customers, by providing Computer Numerical Controlled Precision Mechanical Components & products, meeting the Customer's Specifications adhering to agreed delivery schedule.

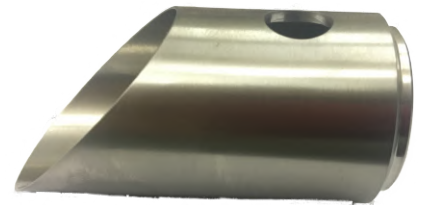

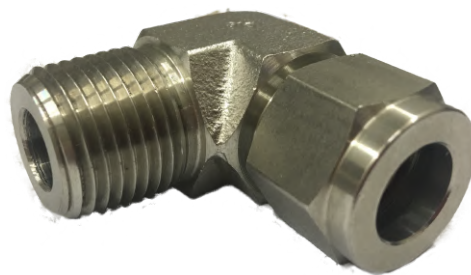

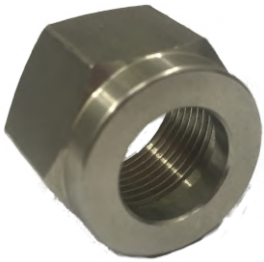

We fulfill all the applicable statutory and regulatory requirements; review and continually improve the effectiveness of our quality management system, by involving employees.
